

SKF 729832 A

Quick connecting nipple

Quick connecting nipple to connect hydraulic pumps and their pressure hoses to the application. The quick connection nipples are available for different maximum working pressures. The pressure hoses, which are attached to the pump, should be provided with a Quick connection coupling and on the application side the matching quick connection nipple should be placed.

- Time savings compared to manually threading of various nipples and pipes together
- More freedom for positioning pumps in relation to the application
- Safe and secure connection
- No need for de-airing hoses when connected to pumps
- Different pressure ratings available.
