

SKF LAGF 50

Grease filler pump for use on drums

Best lubrication practices say that each type of grease requires an individual grease gun and that the refilling has to be a clean process. SKF Grease Filler Pumps are designed to achieve this goal. The LAGF 50 is operated with a mechanical lever and enables optimum cleanliness for filling grease guns from a 50 kg drum.

- Quick filling with low pressure high stroke volume
- Easy usage with all items included
- Tested and approved for all SKF greases
- Ideal for usage together with SKF Bearing Packer VKN 550
